

LEVELLING MACHINE

The laser-controlled levelling machine is an absolute all-rounder for spreading, compacting and levelling on any construction site. Whether for road construction, riding arenas or car parks, with this levelling machine the subsoil is optimally prepared. Levelling surfaces is easy: the machine has a torsion plate at the front to determine the height. When reversing, the machine levels the subsoil at the desired height and inclination. Also available as a standard version without bucket at the front.

All advantages at a glance

- Widths from 1.20 m to 2.00 m
- Perfect levelling of surfaces
- Laser-controlled height and inclination
- Replaceable Hardox blades and floor
- Hydraulic doors

Loader requirements

- Pressure free return
- Additional double-acting hydraulic connection
- Electrical connection 1 x 12 V switchable
- Locking detent
