

## STRAW SPREADER

This bedding machine optimally distributes square and round bales in the stables. The straw bales are conveniently picked up via the loading flap and conveyed to the opening roller via the hydraulically driven scraper floor. From here, the straw reaches the throwing fan with a throwing range of up to 12 meters. A water spraying device is available as an option.

### All advantages at a glance

- Hydraulic opening roller
- Control panel
- 270° rotating and swinging tower
- Hydraulic scraper floor and loading flap

### Loader requirements

- 1 pressure less return and a leakage connection necessary
- 12 v power connection
- Min. 35-60 l/min, 60 l/min recommended
- Multi High Flow or Flow Sharing recommended on the loader

### Options

- Radio remote control
- Water spraying device including 30 l tank with 3 spraying nozzles
