ELECTRIC LOADERS

Emission-free, powerful and quiet

MADE FOR MORE.

ELECTRIC YARD LOADER 16E: COMPACT, EMISSION-FREE AND VERSATILE

The electric yard loader 16e masters even the tightest working environments with ease. Based on the proven 1622 model, the 16e offers emission-free working and opens up new application possibilities in stables and agricultural facilities where manual labour or larger machines were previously required.

While the animals feed in peace and quiet, the 16e takes care of supplies - without any noise or exhaust fumes. With a width of just 0.89 m and a height of 1.99 m, it fits through the narrowest doors and gates and even reaches areas that are difficult to access.

Whether transporting feed, mucking out or maintenance work - the 16e performs a variety of tasks thanks to its compact dimensions and the wide range of Schäffer attachments. With a low operating weight of just 1,345 kg, the loader is particularly gentle on the ground outdoors

and is ideal for concrete slatted floors indoors. The lifting height of 2.23 m and the hydraulic output of 28 l/min provide the necessary power for any task.

Equipped with energy-efficient LED lights and a 9.6 kW electric motor, which is powered by a 48 V lithium-ion battery, the 16e offers up to two and a half hours of operating time for medium loading tasks. The battery pack can be charged either from commercially available wall-boxes with a Type 2 plug or from 230 V power outlets. With both variants, charging the battery pack to 80 per cent capacity takes around 2.5 hours.

The self-generated electricity from a photovoltaic or bio-gas system can be used economically and in an environmentally friendly manner. The new Schäffer 16e electric yard loader offers a pioneering solution for agriculture - emission-free, quiet and efficient.

ADVANTAGES AT A GLANCE

Standard equipment 16e

- Electric motor 9,6 kW
- Hydrostatic four wheel drive with automotive control
- Li-Ion battery pack, 48 V / 12,2 kWh
- On-board charger with Type 2 connector enables charging at a 230V power outlet or a wallbox
- Charging cable type 2 / CEE 16 A, 4 m
- Battery management system
- Energy recuperation
- Eco mode to extend the operating time
- Tyres 23x8.50-12 AS, offset +60
- Genuine Schäffer axle, 5 hole
- Hydraulic oil cooler
- Drum brake as parking brake
- Maintenance free articulated pendulum joint
- Restraining system for protection roof
- LED working headlights: 2 x front, 1 x rear
- Parallel lift
- Mechanically operated additional controller
- Silence gear pump, especially quiet
- Working hydraulics: 28 l/min
- Adjustable steering column
- Hour meter and charging status display
- Driver-on-board switch
- Quick-change frame SWH with hydraulic tool lock

A central red Schaefer 15 skid steer loader is shown from a three-quarter front view. It has a black roll-over protection structure (ROPS), a steering wheel, and large, treaded tires. The brand name "Schaefer" and the model number "15" are visible on its side. Surrounding the loader is a circular arrangement of approximately 20 different attachments, including buckets, pallet forks, trenchers, backhoes, mowers, and other specialized tools, all connected by white curved lines on a blue background.

We reserve changes in the field of construction, equipment, optics and technology without prior notice, due to the continuous development of the products. In case of doubts concerning the performance or the mode of operation of our products due to special circumstances, we recommend the execution of work samples under controlled conditions. We cannot exclude deviations from images or measurements, calculation errors, printing errors or incompleteness in the prospectus despite all due care. We do therefore not accept any liability for the correctness and completeness of the specifications in this prospectus. We do guarantee the proper functioning of our products within the scope of our General Terms and Conditions. Any guarantees that go beyond these are on principle not provided. Any liability beyond the ones set out in our General Terms and Conditions is excluded.

EMISSION-FREE OPERATION – A BENEFIT IN MANY APPLICATIONS

The 23e electric yard loader and the 23e T electric telescopic wheel loader also stand for emission-free work: exhaust gases and noise are now a thing of the past. This is a significant advantage when working inside, but as animals, people and the environment all benefit from clean air and extremely low noise levels, the loaders are well suited to use in outside stables, barns, sheds, storage depots, warehouses and riding arenas too. The innovative water cooling system contributes to clean ambient air with these loaders, and regulates the temperature of both electric motors, removing the need for an oversized fan and the associated dust and straw turbulence that comes with it.

The output of these electric loaders corresponds to that of a 45 HP diesel machine. The electric loaders are also a match for its diesel counterpart when it comes to performance: tipping load and lifting height are almost identical for electric and diesel engines. Of course, existing tools can be used on the 23e T*.

All other advantages which distinguish the proven Schäffer diesel loaders are also standard. These include the maintenance-free articulated pendulum joint and the original Schäffer axles, which guarantee high thrust forces.

Both electric loaders reach a speed of 20 kph. The typical rapid acceleration of an electric vehicle comes as standard, powered by the 21 kW electric motor, which is responsible for the traction drive. It is flanged directly to the rear axle to ensure direct power transmission of the torque. The new electric loaders are a pleasure to drive and has all the technology and power needed to make light work of most tasks.

* hydraulically driven attachments require separate oil cooling on the attachment.

23e, 23e T

Standard equipment 23e

- Electric motor drive: 21 kW; electric motor working hydraulics: 9,7 kW
- Electric four wheel drive with cardan shaft
- Li-Ion battery pack, 240 V / 15.65 kWh (31.3 kWh on option)
- On-board charger with Type 2 connector enables charging at a 230 V power outlet (3 kW) or a wallbox (11 kW)
- Charging cable type 2 / CEE 16 A, 4m
- Battery management system
- Energy recuperation
- Hill-Hold funktion: 'start up assistant' to make hill starts easier
- Tyres 10.0/75-15.3 AS, offset +40
- 20 kph
- Eco mode to extend the operating time
- Genuine Schäffer axle, 6-hole
- Water cooling of electric motors
- Multiple disk brake, maintenance free; service and parking brake
- Maintenance free articulated pendulum joint
- Restraining system for protection roof
- LED working headlights: 2 x front, 1 x rear
- Acoustic reverse warning signal (can be switched off)
- Parallel lift
- Electronically operated additional controller
- Working hydraulics: 42 l/min
- Adjustable steering column
- Hour meter and charging status display
- Rear weight end plate
- Main battery switch
- Driver-on-board switch
- Quick-change frame SWH with hydraulic tool lock

23E, 23E T: THE INNOVATIVE ELECTRIC LOADERS

- **100 % emission-free:** no exhaust fumes, no noise
- **Efficient high-voltage technology,** hydraulics and drive each powered by their own electric motor
- **Available battery capacities: 15.65 kWh or 31.3 kWh for the 23e and 31.3 kWh for the 23e T:** hours of normal use, maintenance-free.
- **On-board charger with Type 2 charging socket for charging from a 230 V socket (3 kW) or a wallbox (11 kW).** 80% battery charge with the wallbox in just 2.2 hours (31.3 kWh battery) or 1.1 hours (15.65 kWh battery).
- **Battery life warranty:** 5,000 operating hours or 5 years, whichever comes first
- **Energy recuperation:** automatic charging of the battery, e. g. during braking processes
- **Significant savings:** reduced maintenance costs and lower operating costs compared to diesel machine or other battery concepts, due to better efficiency
- **No memory effect:** recharging possible at any time
- **Safe temperature regulation:** reliable water cooling of the entire system
- **20 kph:** the only battery-powered wheel loader with a top speed of 20 kph
- **Hill-Hold function:** 'start up assistant' to make hill starts easier

MAXIMUM EFFICIENCY – MINIMUM CHARGING TIMES
THANKS TO INNOVATIVE LITHIUM-ION TECHNOLOGY

When developing the 23e electric loader, achieving maximum energy efficiency alongside emission-free operation was of real importance.

All components of the drive system are perfectly matched to the electric drive. Together with the lithium-ion battery, the loader achieves an efficiency about three times as high as that of a comparable diesel engine. This means that only one third as much energy is needed to operate the machine. Maintenance of the electric motors and battery takes considerably less effort too, which further reduces the costs per operating hour. If there's a biogas plant or a photovoltaic system at the site of operation, the 23e will be even more economical to use.

With the help of the standard type 2 plug and an 11 kW wallbox, the large battery pack can be charged to 80 % in just 2.2 hours. With the small package, this time is halved. Alternatively, it can also be charged using 230 V / 3 kW household power.

The use of lithium-ion technology makes the 23e a real innovation. The customer receives a guarantee of 5,000 operating hours or five years of use, whichever comes first. It can be charged at any time without affecting the lifetime of the batteries - another advantage of lithium-ion technology.

23E T: THE ELECTRIC TELESCOPIC WHEEL LOADER FOR THAT EXTRA RANGE

Schäffer unveiled its first conventionally powered telescopic wheel loader in 1994. Over the following decades, Schäffer evolved into the leading supplier of articulated telescopic wheel loaders, offering a diverse range with operating weights from 2.8 t to 13 t.

With the 23e T, Schäffer introduced the world's first fully electric telescopic wheel loader, further enhancing its expertise in this area. From a technical perspective, the 23e T is

based on the 23e wheel loader. Thanks to its telescopic arm, the 23e T has a lifting height of 3.72 m, is available with either an overhead guard or cab and offers a tipping load with pallet fork of 1.3 t at a weight of 2.8 t. The articulated joint makes the machine particularly agile; the inner turning radius is just 1.15 m. Depending on the tyres, the 23e T measures between 1.41 m and 1.59 m in width with an overall height of 2.19 m with an overhead guard or 2.14 m with a cab.

Standard equipment 23e T

- Electric motor drive: 21 kW; electric motor working hydraulics: 9.7 kW
- Electric four wheel drive with cardan shaft
- Li-Ion battery pack, 240 V / 31.3 kWh
- On-board charger with Type 2 connector enables charging at a 230 V power outlet (3 kW) or a wallbox (11 kW)
- Charging cable type 2 / CEE 16 A, 4 m
- Battery management system
- Energy recuperation
- Hill-Hold funktion: 'start up assistant' to make hill starts easier
- Tyres 31x15.5-15 AS, offset 0
- 20 kph
- Eco mode to extend the operating time
- Original Schäffer axles, wide design
- Ferro-form sliding elements in the telescopic arm
- Tool cylinder in the telescopic arm
- Electric pressure relief of hydraulic couplings (on the steering tower and telescopic arm)
- Water cooling of electric motors
- Multiple disk brake, maintenance free; service and parking brake
- Maintenance free articulated pendulum joint
- Restraining system for protection roof
- LED working headlights: 2 x front, 1 x rear
- Acoustic reverse warning signal (can be switched off)
- Z-bar boom with parallel lift
- Electronically operated additional controller
- Working hydraulics: 42 l/min
- Adjustable steering column
- Hour meter and charging status display
- Counter weight 100 kg mounted under rear chassis
- Rear weight end plate and towing hitch
- Main battery switch
- Wide chassis with wider fender
- Driver-on-board switch
- Quick-change frame SWH with hydraulic tool lock

MADE FOR MORE.

Because we know: If you want more, you need more than just standard. That is why we at Schaeffer never settle for the first thing that comes along. We think ahead and have been developing machines that truly make a difference in the real world for 70 years. Machines that offer more performance, more quality and more reliability for everyone who depends on powerful technology every day.

Over 45 machine types and more than 1,000 tool variants provide you with maximum flexibility, be it as a farmer, construction professional or recycling expert. Our loaders are compact, powerful and efficient and capable of handling tasks that typically demand much larger machines.

Trust in genuine "Made in Germany" quality – manufactured in Erwitte, with an exceptionally high vertical range of manufacture. Schaeffer relies on robust materials and high-quality components. From specially developed axles and solid articulated joints to countless thoughtful details, every element ensures maximum stability and reliability, even in the most demanding conditions. Some features that are not available elsewhere or are only available at extra cost come standard with Schaeffer.

YOUR DEALER:

Specially developed technologies and efficiency systems noticeably enhance performance and driving comfort, boosting productivity for every application.

A Schaeffer machine represents unmatched product quality and long-term cost-effectiveness. Durable components, low wear, significantly reduced fuel consumption and minimal maintenance ensure consistently low operating costs.

At the same time, our machines also stand out for their high value retention and a reliable spare parts supply, with 24-hour delivery available 365 days a year.
